

# TARVAS

Premium Lead Free Bullets

## Trumpeting Design

Minimal meat loss

Deep wound channel

Instant killing power

Red Moose

# TARVAS - Trumpeting Bullets

Wound channel comparison, 30 CAL

Bullet expansion with different impact velocities

**HIGH HYDROSTATIC KICK!**

Pressure cavity built by the trumpet shape nose is extremely effective on high liquid containing vitals

*Trumpet design advantage*

# TARVAS - Trumpeting Bullets

Pressure stamp → Minimal meat loss and heavy damage on vital organs

*Exit wounds on a moose after passing through*

*Wet paper mass test*

## TARVAS - Features and Benefits:

- **MINIMAL MEAT LOSS**
- **DEEP WOUND CHANNEL**
- **INSTANT KILLING POWER**
- **TRUMPETING DESIGN** - same caliber can be used for small and large game
- **HIGH HYDROSTATIC KICK**
- **CONTROLLED EXPANSION**
- **LEAD FREE** - non toxic
- **NO COPPER DEPOSITS IN BARREL** – removes fouling
- **EXCELLENT ACCURACY**
- **BALLISTIC COEFFICIENT (BC) 0,301-0,340**
- **WEIGHT RETENTION: 98%**
- **AVERAGE RUNNING DISTANCE AFTER 1st SHOT: 30m\***
- \* Based 2012 - 2013 received info, please see full database [www.redmoose.eu](http://www.redmoose.eu)
- **SUPPORTED BY INNOVATIONS CENTER** - patent pending
- **100% Made In Finland**

# TARVAS Bullets 2014 (Q1)\*

Caliber	Material code	Weight (g)	Weight (grain)	BC	Recommended impact speed	Recommended calibers
6,5 mm / .264	T264140-1	9,1	140	**)	850-550 m/s	All 6,5 mm / .264
7,83 mm / .30	T300165-1	10,7	165	0,301	850-550 m/s	308 Win
7,83 mm / .30	T300180-1	11,7	180	0,317	850-550 m/s	30-06, 300 Mag
8,6 mm / .338	T338200-1	13	200	0,304	850-550 m/s	338 Federal , 338-06
8,6 mm / .338	T338225-1	14,6	225	0,340	850-550 m/s	338 Mag
9,3 mm / .366	T366250-1	16,2	250	0,323	850-550 m/s	All 9,3 / .366

\* New calibers under development

\*\* To be defined
